: Perocket would hold. It looked as er i ust have been several hundied didiars. We all knew of the profitable rapaciousness of the Pullman tar porter, but never dreamed that his accumulations were so large. Yet the friendly human spark of forgiveness and sympathy was in our hearts for the poor fellow losing so much at one fell swoop. We were gathered in the smoking compartment and had a consolation purse under advisement for the darky, when he came along him-

"'Mah Lawd, dat was the lucklest sperience I done ever had,' he said, chuckling all over.

"'Lucky!" "We were astonished. A poor servaut robbed of hundreds chuckling with glee!

A Caroline Islands Legend.

The Caroline islands group includes besides coral islands five mountainous islands of basaltic formation, beautiful and fertile with rivers and springs.

Among the many queer legends of these children of the Pacific there is none mere highly improbable than their theory as to the origin of these islands and their inhabitants. They think they themselves were very strong

in the water-in fact, they lived in it. The story goes that a woman and her children were floating around on the reef when a man appeared from the west with a basket of soil on his shoulders. He had started out to make an Island with a mountain on it. One of the children cried out to him, "Give us a little soil to make a place for our mether to rest, for she is very weak and cannot swim." He took out a handful of the earth and threw it down, making an island. As the man was going on his way over the water the son slyly made a hole in the basket so as I proceeded on his way he left a trail or land behind. Suddenly he became conscious that the basket somed light, and, looking around, he sa v the land. In his anger he turned about and trod upon it, and thus the is-

lands were formed. Insisted on a Change.

The spick and span young officer who calmiy takes command over veterans grown "gray in battle and victory" is sometimes an amusing person, particul AND GET THE larly if a sense of his own importance

is unduly developed. On one occasion word was received in various South African camps that on such and such a morning every man in Officer -- 's army must change his shiti.

The Imperial Light horse, who form ed part of the command, had only one shirt apiece, and that was on their backs. Fo a r - - bror was dispatched to explain. But the honorable and galhan, othicer, fresh front Sandhurst, know his business.

"If the men of the Imperial Light herse have not got a second shirt," said he firmly, "let them change shirts with each other. My orders are imperative."

And There He Wus.

"Yes," he said, "I think a man owes it to himself to choose a wife who can do housework, if necessary. Of course I wouldn't want my wife to work in the kitchen, but she ought to be able to do so. One never can tell what may happen. Girls sometimes leave suddenly, and fortunes are occasionally swept away. In my opinion, a girl does herself just as much honor in learning to de housework as in learning to play the piano or in studying 'Omar Khayyam,' and"-

"Oh, Mr. Spoodlekins," she cried, "excuse me for interrupting you, but such a funny thing happened this afternoon. I dropped the dishcloth and said to myself, There, I know somebody will come this evening? And here you are?" -Chicago Times-Herald.

Rarlty of a Dread of Death.

Sir Lyon Playfair, who represented the University of Edinburgh for 17 the most eminent men of England, and he put this question to most of them, "Did you in your extensive practice ever know a patient who was afraid to die?" With two exceptions, it seems, they answered "No." One of these exceptions was Sir Benjamin Brodle, who said he had seen one case. The other was Sir Robert Christison, who had seen one case, that of a girl of bad character who had a sudden accident. -Health.

Legislation most required by the State is fundamental. The work of the legislature to the present has been chieffs on details that required attention. The JOURNAL has no complaint to make about what has been done, but there are two matters-irrigation and taxation - that should receive special attention and care before the legislature adjourns. What has been positive has been accomplished respecting irrigation or taxation.

The time given to the legislature to do its work will expire by limitation some speculation respecting the inten- that has a silver mine in it. tion of its members regarding these malters. Irrigation includes the future action and laid its conventions open to of the State so fully that it should be a charge of deliberate falsehood when among the leading matters to occupy seeking to destroy the energies of the the time and attention of law-making mining States. bodies within the State. It is fundamental in all its phases, because it represents permanent prosperity for toward the south when it was known the people.

Texation is also fundamental, as it represents by its continued presence purpose to secure the art to which we principles in all governments by civilized men. In a taxation system there is represented intelligence and ability cate questions have come for solution before that boils. from the principle included in taxation than have arisen upon all other principles in government, which makes taxation fundamental in every sense in which it is presented to a self governing people.

The principle of taxation as it exists in the State at present represents the Charley Wallace or absolute form of government. The principle when represented in the absolute form of government has always been unjust, and for that reason oppressive. The absolute form of government imposed upon France by Louis XIV, of necessity included the absolute form of sexetion, which was so unjust that it led up to the French revolution.

The principle of absolute form and assumed right of absolute taxation was the chief cause to bring forward the revolution by the American colonies. In the light of history and common sense, is it not time to relieve the people of the Charley Wallage or absolute form of taxation? There is not an enlightened nation or an intelligent people beyond the lines of Russia and Nevada who would submit to a system of taxation so unjust as the absolute aystems imposed upon Russia and upon the prople of Nevada. Guns and bayonets hold Russia where it is, and it may be well to request the legislature to accertain the cause there is for enbmission by the people of Nevada to an absolute system of tex-
